(c) Secure Agric

AgriKoin

AgriKoin was created as an ERC-20 token minted on the ethereum blockchain with a total supply of Three hundred million (300,000,000) tokens and (AGK) as its symbol. 25% will be sold in pre-sale and 40% in initial token offering (ITO). The pre-sale price is \$0.009 and the initial token offering price is \$0.025. AgriKoin is the native utility token that will be used for exchange of values within Secure Agric platforms, and will allow investors/farmers to have access to all of our services. If you have agriKoin tokens, don't worry about your farm, food store and medical bills.

AGRIKOIN WILL SERVE THE FOLLOWING USE CASES:

A utility token for commodity exchange on Secure Agric e-market place/supply chain "AgriKonnnect"& agro-tech partners

A utility for tokenizing farmers/agribusiness savings on the "Rumbu" agro-micro savings/micro loan platform.

A utility token for subscribing to our farmers and agribusinesses' health and crop insurance platform "Agro-insure".

A utility for rewarding our ambassadors and bug hunters.

A utility for sending & receiving payments from any part of the world.

A utility for household/personal bills payment.

TOKEN LISTING ON EXCHANGE

Agrikoin will be listed on uniswap exchange after presale. After the initial token offering, it will be listed on various recognized and popular exchanges to allow investors trade, send and receive payments at their convenience.

- ✓ Create your agpay wallet
- ✓ Send money to your wallet (using the generated unique account number)
- ✓ Swap your Naira to agrikoin

Congratulations for being part of the green Gold revolution!

agrikoin.com

Agrikoin is available for purchase at <https://agrikoin.com> and <https://agpay.ng>. A multidimensional wallet built to support both fiat and crypto assets such as agrikoin. Any user created wallet account, will generate a unique account number that can send and receive payments from any bank in Nigeria. Through the Agpay wallet, Naira balance will easily be swapped to agrikoin.

agpay.ng

Agpay is a fiat & crypto wallet (payment) platform, developed to bank the unbanked/underbanked small holder farmers , agribusinesses & their customers i.e. end consumers, which are the majority of Nigeria's & Africa's financially excluded populace. We've identified that financial exclusion is one of the major factor affecting the livelihood and the economy of small holder farmers in Nigeria & Africa. Secure Agric looks at the growing opportunity to tokenise peer to peer payments (P2P), business-to-person (B2P) payments (typically between agribusinesses and farmers) and government-to-person (G2P) payments (typically between governments and farmers) in agriculture.

Rumbu

Rumbu is a micro savings and micro loan platform, typically for those within the agricultural value chain. Having looked at the negative impact of foreign exchange and inflation on farmers & agribusinesses, Rumbu is an all-inclusive solution that tokenize savings.

Agpay POS terminal

our customized point of sale terminals are designed in such a way that, users can access their agpay, rumbu and agrikoin asset from any of our agents across Nigeria.

Agpay

Agrikard

Agrikard is a Naira fiat and Agrikoin compatible debit card, that uses near field connection (NFC), concept popularly known as “contactless payment”. The card only works with our customized point of sales terminals (POS). The goal is to make payment unique for farmers and agribusinesses therefore, taking financial inclusion to the last mile farmers.
